

- ♥ Always remove batteries before each cleaning and before storing.
- ♥ Always clean your toys after each use. I recommend “**Come Clean**” by Pure Romance, which contains an anti-bacterial agent to protect against infection.
- ♥ Never use soap and water, even if it contains an anti-bacterial agent. Soap, baby oil and Vaseline type products will damage and deteriorate the product over time.
- ♥ Never submerge your toys in water unless it's waterproof.
- ♥ Never swing or pull your toys by the cord as it may damage the connection.
- ♥ Store your toys, after cleaning, in a plastic or cloth bag. Keep in a cool dry place and avoid storing it near any area that's too warm.
- ♥ Do not store toys together in the same bag as contact with each other can cause melting and damage of the silicone.
- ♥ Do not use silicone lube with any silicone product, as it will also cause the product to melt.
- ♥ To keep the silicone toys from getting sticky, give them a light dusting of powder. I recommend “**Dust Me Pink**” as it does not contain talc, which can be harmful used internally.
- ♥ Always use a lube with all cock rings (Jelly C-Ring, Double Trouble, Magic Jelly Rings, Jelly Tool Belt, Pleasure Ring, etc) to avoid rubber burn and limit use to 30min.
- ♥ Do enjoy your purchase and make time to play alone or with your partner.
